

# HOW TO ASSEMBLY YOUR SERVO POINTER PROJECT

## Includes:

Cardstock  
Template

micro:bit

Servo  
Controller

Alligator  
Clips

- 1 Connect your micro:bit to your computer (this will be your power source).

- 2 Connect your alligator clips to the servo motor using the rectangular black box at one end.

- 3 Connect the brown wire to GND, the red wire connects to the 3v pin and the orange wire connects to pin 0.

# HOW TO ASSEMBLY YOUR SERVO POINTER PROJECT

**4** Insert your micro:bit below. Fold the bottom flaps to secure the micro:bit.

**5** Fold the side flaps back so they can be used as a stand.

**6** Fold the top flap back and insert the tabs into the slots on the sides to secure them all together. Place the servo in the hole - make sure the white bump for the servo arms is closer to the bottom of the activity.
